

Linking OCULUS Keratograph[®] to WAVE

Step 1:

Click on the **WAVE icon** and login

The screenshot shows a web browser window titled "Wave Contact Lens System". The window contains the WAVE logo at the top center. Below the logo, there are two input fields: "User ID" and "User password". The "User password" field has a "Forgot password?" link to its right and a toggle icon to its left. Below the input fields, there is a line of text: "By clicking Continue, I agree to the [Terms and Conditions](#)." Below this text is a blue "Continue" button. At the bottom of the window, there is a copyright notice: "© 1997 - 2022 WAVE Lens Designer || Version: v-09.50.00".

Step 2:

Make sure all Keratograph[®] software windows are closed.

Step 3:

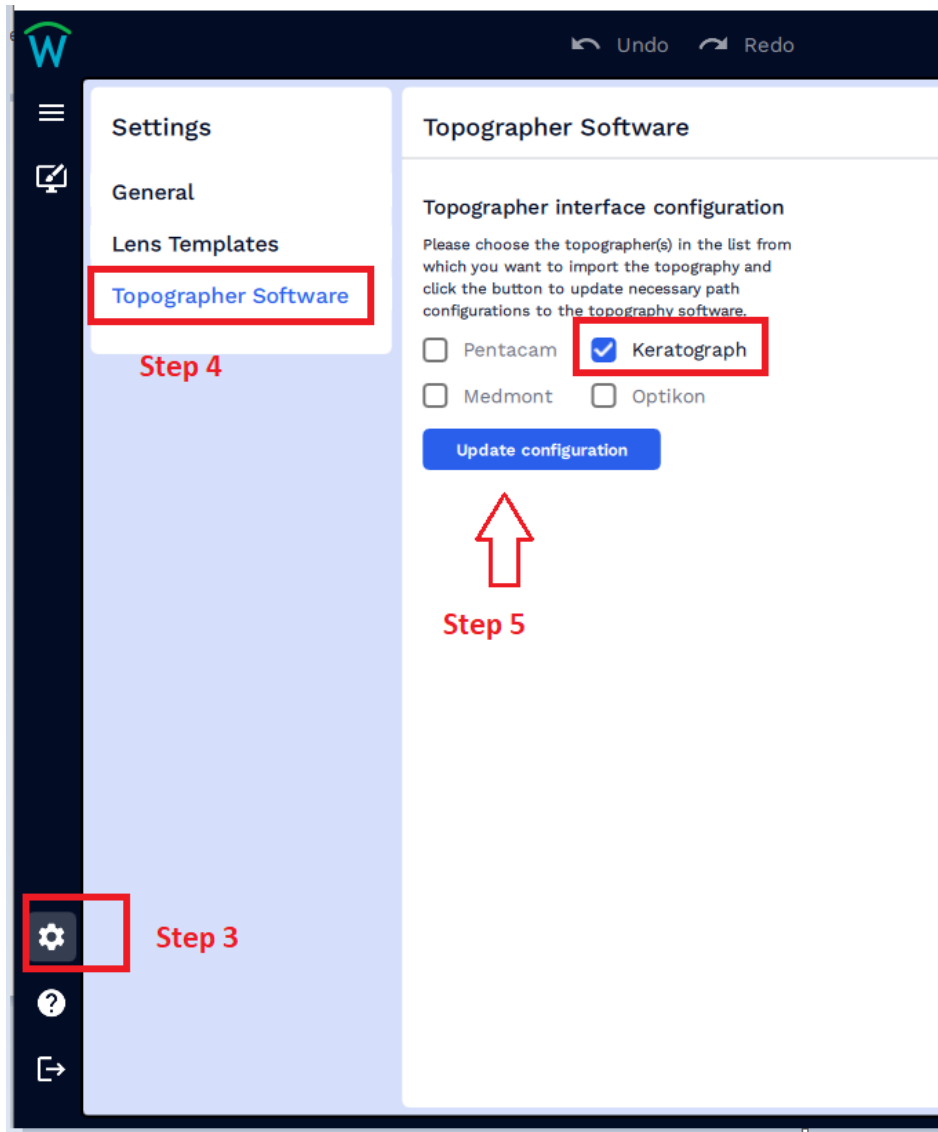

Click on the **Settings icon** (small gear) in the lower left-hand corner

Step 4:

On the Settings screen, select **Topographer Software**

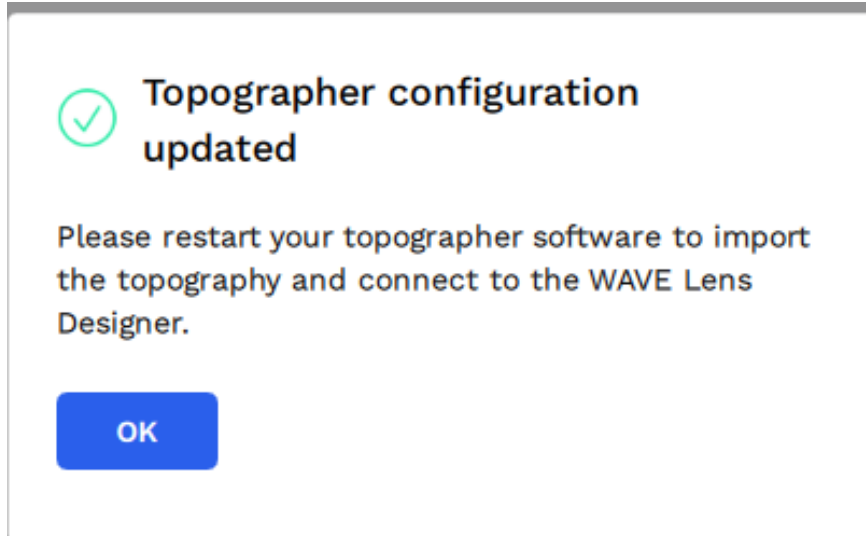

Step 5:

Put a check mark next to **Keratograph** and click on **Update configuration**

Step 6:

Topographer configuration updated will pop up

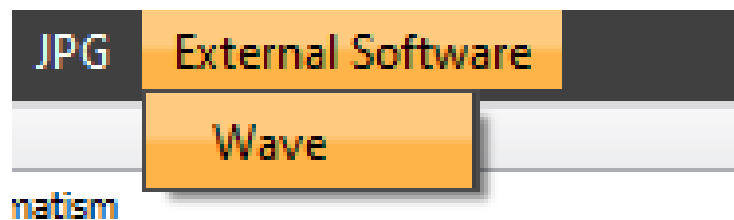

Step 7: Click **OK**

Step 8:

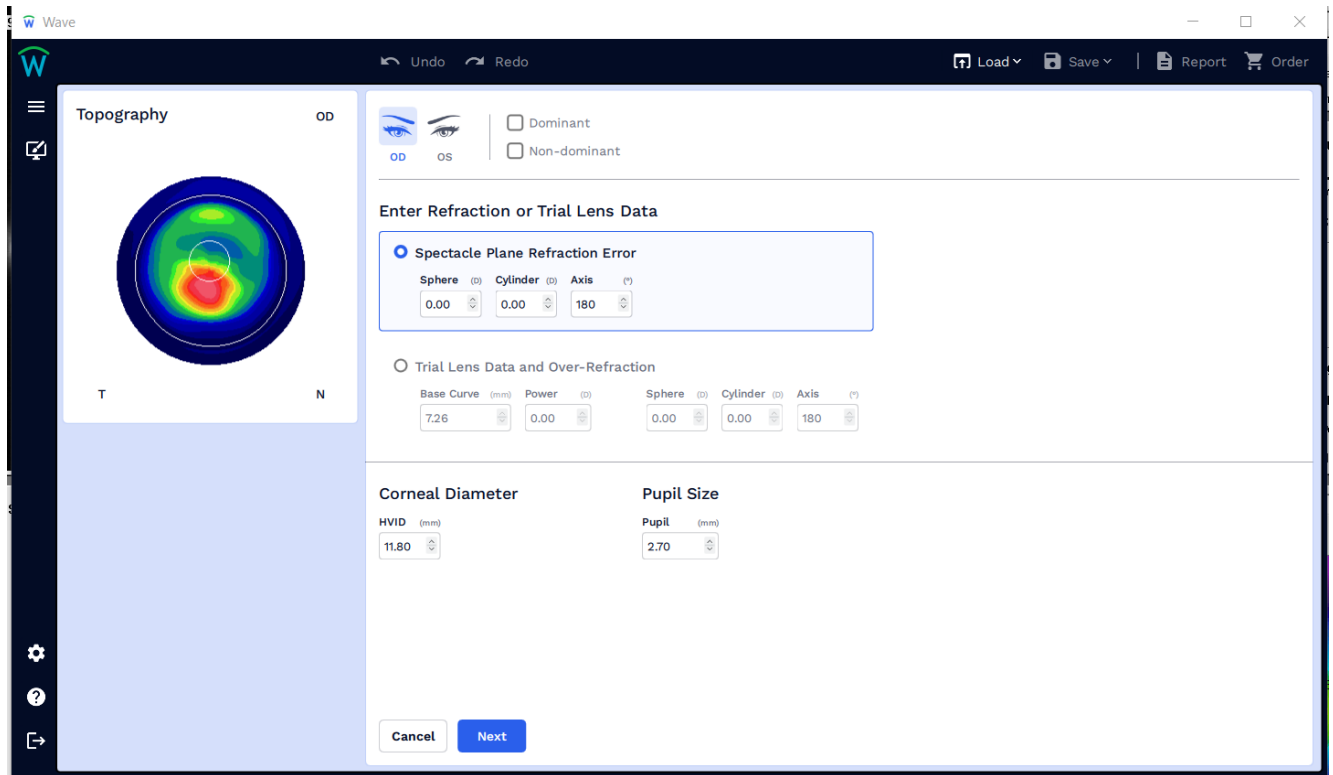

An active link is now established between the Keratograph[®] and WAVE for importing the topography data into WAVE.

To test the import function, open the Keratograph[®] software. Select a Patient's topography. Under **External Software** choose '**Wave**'.

Step 9:

The WAVE Software will open. Log into WAVE. WAVE will now display the patient's topography map
